Experience

Venture Network

Co-Founder and Chief Technology Officer
December 2017 - Present

We transform the Venture Capital with rewards, crypto fund, and assets exchange. Venture Network is focused on building a liquidity and risk diversification platform for startup founders and venture investors on Blockchain.

Learn more about Venture Network at <https://venturenetwork.io>. Join our community for Q&A with our team at <https://t.me/venturenetwork>

Tipsi

Senior Frontend Developer
December 2016 - September 2018 (1 year 10 months)

As part of extraordinary talented team my achievements and responsibilities was:

- Create a lot of screens and components for new version of Tipsi App on React Native for iOS and Android apps
- Make sure that screens have pixel-perfect design
- Create/modify automated tests using Selenium, Appium and Detox
- Create/modify jest tests
- Create screens and components for internal management solution on React

Qwintry

Senior iOS Engineer

October 2015 - March 2017 (1 year 6 months)

Newark, DE

Qwintry is leading mail-forwarding solution based in United States. My responsibilities was to create first version of Qwintry iOS App for customers and I was the only one engineer who created all app versions 1.x. App was developed on Swift. I also created internal Qwintry Warehouse app which was dedicated for internal enterprise purposes (manage incoming/outgoing parcels, scan barcodes, manage customer requests).

My key achievements here was:

- REST API layer with strong types and error handling
- Making design decisions to make sure that application complains iOS Design Guidelines
- Managing design team
- Programmed more than 20 screens with fully responsible design using Auto Layout (iPhone + iPad)
- Integration with Stripe and Apple Pay

After version 1.x was deployed, I was responsible for planning architecture and porting existing technical solution to version 2.0, which will be developed using React Native + Redux

Tipsi

Senior iOS Lead

June 2016 - December 2016 (7 months)

Chat Center

Team Lead, iOS and Server engineer

March 2014 - October 2016 (2 years 8 months)

Palo Alto, CA

Chat Center is the universal way for business owners to connect and chat directly with their customers, clients, followers, visitors, business contacts etc. I created whole architecture for product, developed backend with API on node.js + express.js, developed mobile application on iOS platform and was responsible for look&feel of whole product on all platforms. Also I was responsible for managing a team (frontend developer, designer, Android developer) and delivering product to store.

Minimum Inc.

Lead iOS Developer

February 2010 - June 2016 (6 years 5 months)

Byron Bay, Australia

Senior iOS developer and then Lead iOS developer of Minimum Inc.

Responsible for the development and delivery of all Minimum Inc. apps to the App Store.

- Implementing User Interfaces
- Creating non-standard controls
- Write tasks lists for the iOS developers
- Mobile strategy consulting
- Internal process management using SCRUM and Kanban methodology
- Check our products comply with the highest quality standards
- REST API layer
- Integrating 3rd party libraries to our iOS application (Stripe, Braintree etc)
- Product management

just.me, Inc

iOS Developer

February 2012 - March 2014 (2 years 2 months)

Mountain View, CA

iOS Developer in charge of whole design and UX implementation at just.me iOS app

- Implementing User Interface
- Creating animations
- Fixing User Interface related bugs
- Creating non-standard controls
- Pixel-perfect views creation
- Creating prototypes for rapid testing of new functions

Webvertex

PHP Developer

August 2007 - January 2010 (2 years 6 months)

Creating custom modules for CMS

EPAM Systems

Junior Java Developer

2008 - 2008 (1 year)

Working on ERM system for our customers

Education

Povolzhskiy State University of Telecommunications and Informatics

Master's degree, Computer Science · (2006 - 2011)
